

### **Ementa de Curso Livre 2024/2:**

Disciplina:	<b>New Perspectives in the Global History of Science</b>
Código:	
Curso:	Mestrado/Doutorado
Status:	Curso Livre
Professor responsável:	Kapil Raj
Professores convidados:	
Carga horária:	8hs
Créditos:	
Dia/Horário:	5, 7, 12 e 14 de agosto - 10h às 12h
Início do curso:	05/08
Local das aulas:	Sala 305

### **Ementa:**

Kapil Raj

In the almost 75 years since the institution of the history of science as an academic discipline mainly in the United States, Britain and in a few countries in northwestern Europe, its demography has evolved dramatically. Initially composed mainly of white men, it is now practiced in all the continents by men and women of diverse origins. Not surprisingly then the terms upon which the discipline was initially founded, mainly centered around a Euro-U.S. perception of modern science and its chronology, have been increasingly called into question.

The course aims to equip graduate students to take a theoretical stance in the debate surrounding scientific hierarchies on a global scale. It aims to consider both local agencies and the existence of inequalities without the Eurocentric and diffusionist bias.
